alex.morgan@example.com

New York, USA
Open to remote

SOFT SKILLS

- Technical leadership
- Problem solving
- Cross-team collaboration
- Mentoring
- Written communication
- Curiosity

SIDE PROJECTS

Trailmark
github.com/alex-morgan-example
Open-source Go CLI that turns GPS tracks into printable hiking maps, used by a few hundred hikers.

EDUCATION

2014
M.Sc. Computer Science
State University, Boston, USA

2012
B.Sc. Computer Science
State University, Boston, USA

LANGUAGES

English // native
Spanish // fluent
French // intermediate

PROFILE

Senior backend-focused software engineer with ten years of experience building and operating scalable systems. Tech lead for a team of six engineers, delivering payment services for a logistics platform.

Experience spans high-volume event ingestion, event-driven distributed services, and production API latency reduction. Skilled in Go, Python, PostgreSQL, Redis, Kafka, Kubernetes, AWS, Terraform, and REST APIs, with a focus on reliability, observability, and technical leadership.

EXPERIENCE

2021 – Present // Northwind Logistics // *Senior Software Engineer, Tech Lead*
Tech lead for payments services, owning the architecture and delivery of invoicing and carrier payouts.

- Cut the p95 latency of the invoicing API from 1.2 s to 180 ms through caching and query optimization
- Redesigned the payout pipeline as event-driven services, processing $40M a month with zero data loss
- Introduced trunk-based development and feature flags, moving the team from weekly to daily releases
- Mentored four engineers, two of them promoted to senior roles

2017 – 2021 // Brightline Analytics // *Software Engineer*
Backend engineer on a marketing analytics SaaS, in a product team of eight.

- Built a high-throughput data ingestion service handling 2 billion events a day on Kafka and PostgreSQL
- Led the migration from a monolith to containerized services on Kubernetes
- Set up the observability stack (metrics, tracing, alerting) and the on-call rotation

2014 – 2017 // Cobalt Studio // *Full-Stack Developer*
First engineering hire of a web agency, building e-commerce and booking platforms for small businesses.

- Delivered fifteen client projects end to end, from requirements to production support
- Built a reusable e-commerce starter kit that halved the setup time of new projects

HARD SKILLS

Languages	Go, Python, SQL, TypeScript, JavaScript (Node.js)
Backend & data	REST & GraphQL APIs, distributed systems design, event-driven architecture, Kafka, RabbitMQ, PostgreSQL, Redis, Elasticsearch
Cloud & DevOps	Kubernetes, AWS, Terraform, Docker, observability (Prometheus, Grafana, OpenTelemetry), GitHub Actions, CI/CD
Practices	Automated testing, trunk-based development, code review, technical writing, Agile (Scrum, Kanban), AI-assisted development
